| Vision: | <i>To be a global leader in sustainability by providing unique, integrated solutions across environmental and financial markets</i> |
| Strategic Direction: | Increasing shareholder value through logical growth strategies: <ul style="list-style-type: none">• Organic expansion of existing successful assets;• Utilising a listed corporate structure to execute complementary acquisitions;• Integration of business portfolio to extract synergies and improve customer services;• Building a professional, high quality management team to execute the vision;• Selecting the right 'green' markets that offer synergies and are complementary to existing skill base;• Using Australia as a test market for international expansion (e.g. GreenPlumbers USA);• Building an integrated environmental services business model to focus on delivering the government's new emissions reduction and reporting legislation; and• Focus on sustainable solutions and technologies with international application. |
| Companies: | The Green Invest suite of integrated companies includes: |

GreenPlumbers®
CREATING SUSTAINABLE COMMUNITIES

GreenPlumbers®
CREATING SUSTAINABLE COMMUNITIES USA

GreenPlumbers® is one of Australia's leading environmental products and installation services.

Originally founded by the Master Plumbers and Mechanical Services Association of Australia (MPMSAA) in

2005, GreenPlumbers® now provides national distribution and installation of environmentally friendly plumbing products and green

audits through a network of trained and accredited GreenPlumbers® in Australia and throughout North America.

Sustainable Footprint satisfies the growing worldwide market demand for greenhouse gas, energy and water reduction initiatives.

SF provides clients with valuable insight into the status of energy and water use within their organisation through the process of a comprehensive energy and water assessment.

SF also provides organisations with a full range of environmental sustainability education workshops.
